

SHB 1060 - H AMD 17

By Representative Angel

FAILED 2/23/2009

1 On page 2, line 17, after "(9)" strike "Sustainable residential
2 weatherization" or "weatherization" and insert "(a) Weatherization"
3

4 On page 2, line 19, after "residence))" strike all material
5 through "technologies" on line 27 and insert "replacing, repairing or
6 installing one or more of the following:

7 (i) Caulking and weatherstripping of doors and windows;

8 (ii) Furnace efficiency modifications, including, but not limited
9 to: (A) Replacement burners, furnaces, or boilers or any combination
10 thereof; (B) devices for minimizing energy loss through heating
11 system, chimney, or venting devices; and (C) electrical or mechanical
12 furnace ignition systems which replace standing gas pilot lights;

13 (iii) Clock thermostats;

14 (iv) Ceiling, attic, wall, floor, and duct insulation;

15 (v) Water heater insulation;

16 (vi) Storm windows and doors, multiglazed windows and doors, heat-
17 absorbing or heat-reflective window and door materials;

18 (vii) Cooling efficiency modifications, including, but not limited
19 to, replacement air-conditioners, ventilation equipment, screening,
20 window films, and shading devices;

21 (viii) Wood-heating appliances; or

22 (ix) Other insulating or energy conserving devices or technologies
23 allowed under federal weatherization programs and the energy
24 matchmakers program.

25 (b) Incidental repairs necessary for the effective performance or
26 preservation of weatherization installations are a permitted use of
27 funds administered by the department. Such repairs include, but are

1 not limited to, framing or repairing windows and doors that could not
2 otherwise be caulked or weather stripped, and providing protective
3 materials, such as paint, to seal materials installed under this
4 program"

5

EFFECT: (1) Replaces the definition of "sustainable residential weatherization" or "weatherization" with a new definition for "weatherization." (2) Deletes a provision specifying that, to the extent feasible, funds from the weatherization program must be used to support and advance sustainable technologies.
